

DASHBOARD ACCESS & TROUBLE SHOOTING GUIDE

QUESTION: How do I get access to the Read 180 Next Generation Dashboards?

ANSWER:

In order to view data on the NG Dashboard, the following conditions have to be met. Please note that the Dashboard is a weekly overview and does not represent your students real-time data. You should continue to use SAM's Reports tab for up-to-date student performance data.

To view data in the Dashboard:

1. The teacher's account must be active in SAM.
2. The server needs to be registered with SAM Connect.
3. All the schools in the database will need to be matched in SAM Connect.
4. The server must be actively checking in with SAM Connect.
5. The NG application suite must be installed into the database and have the latest patches installed for all components.
6. The server must have Read 180 NG licenses and have students enrolled into at least one NG application.
7. 3-45 students must be assigned to a class that has Read 180 NG checked in the Manage Applications portion of the classes SAM profile.
8. There can not be duplicate authorized users in SAM Connect registered to a server that is inactive or that has different profile information than the original
9. There can be no clones of the active server in SAM Connect.

Note: If all of these conditions are met, then the teachers and administrators should have access to Read 180 Next Generation Dashboard using their existing SAM username and password. To access the Read 180 Next Generation Dashboard please go to: <https://samconnect.scholastic.com/auth/zip/DASH.html>
